Job opening:
For our team in the U.S., we are currently looking for

Application Specialist – MSOT Imaging

Position: Application Specialist – MSOT Imaging
Company: iThera Medical GmbH
Branch: Medical / Laboratory Equipment
Location: U.S. (preferably East Coast)
Employment: Full-time position
Qualifications: University degree in Biology or Biological Engineering; previous work experience a plus

About iThera Medical
iThera Medical was founded in 2010, as a spin-off from the Helmholtz Zentrum Muenchen. We develop and market scanners and reagents based on our proprietary optoacoustic molecular imaging technology, for use in preclinical and clinical applications. Please visit our website for more information (www.ithera-medical.com).

Your role
As “Application Specialist – MSOT Imaging”, you will be responsible for the development of preclinical and clinical applications for our ground-breaking imaging systems. This includes the preparation and execution of imaging studies for cancer-, cardiovascular-, and brain-related diseases, in close cooperation with partners from industry and academia.

Specific activities include:
- Providing application support for customers (including training, on-site experiments)
- Setting up and supporting preclinical / clinical studies using MSOT imaging systems
- Gathering imaging system requirements from MSOT users and key opinion leaders
- Providing marketing and sales support (incl. input to sales materials, customer visits / seminars)
- Contributing to scientific publications related to preclinical / clinical MSOT applications
- Preparing and participating in scientific conferences

For many of these activities the “Application Specialist – MSOT Imaging” will work with academic and industry collaborators.
Your qualifications / profile
The qualified candidate should have a strong background in Biology, Molecular Biology, Biological Engineering or related fields, excellent analytical skills, a good command of the English language and practical experience in one or more of the following areas:

- Optical or optoacoustic imaging
- Preclinical imaging studies, including small animal handling
- Imaging biomarkers / targeted contrast agents
- Clinical imaging regulations

In addition to the “hard skills” listed above, we require a passion for exploring new ground, starting new business and working closely in a team.

We offer

- An exciting and diversified work environment
- Breakthrough technology in the growth market of medical technology
- Substantial individual responsibility and the opportunity to realize own ideas
- A young, dynamic, adventurous team to work with

Do you want to join us on our ride into a brighter imaging future? Do you want to take on responsibility and shape leading-edge technology, in a dynamic environment? Then we are looking forward to hear back from you!
